Short curriculum vitae

Dimitra Melissaropoulou is Associate Professor of Linguistics at the Department of Italian Language and Literature, Aristotle University of Thessaloniki. Her research interests focus on in the fields of morphology, language variation and change, dialectology, dialectal typology, and language contact. She obtained her PhD degree in 2007 at the University of Patras (with a scholarship HERAKLEITOS funded by the European Science Foundation and the Greek Ministry of Education, under the supervision of Prof. Angela Ralli) and then awarded a Post-doctoral Scholarship on variation in word formation (by the Greek State Scholarships Foundation). She has worked as an Adjunct Lecturer at the Department of Philology, University of Patras, at the Department of Speech and Language Therapy, Technological Institute of Patras, at the Open University of Cyprus and the Hellenic Open University. Being a member of the Laboratory of Modern Greek Dialects, her experience also involves participation, as a post-doctoral fellow, in the planning and implementation of a significant number of research projects on dialect documentation, description, and analysis. She is the scientific coordinator of the Research Program "DiCaDLanD: Digitizing the Cappadocian dialectal landscape" (2018-2021) funded by H.F.R.I. and G.S.R.T. (2018-2021).

Her publications address issues on the diachronic and synchronic study of Modern Greek dialects and Standard Modern Greek, based both on fieldwork and written sources. The focus of her research has been on the study of language variation and change and language contact emphasizing the morphological processes of diminution and augmentation, the restructuring of nominal inflection, the integration of nominal and verbal loans, the combinability of derivational suffixes, the study of perfective structures and the comparative constructions in Modern Greek Dialects and the notions of complexification vs. simplification as a result of intra- and/or extra-linguistic mechanisms.

Area of specialization: "Theoretical and comparative linguistics: Morphology" (GGI 3752/11-10-2019 v.B').
